

Plantronics Calisto Bluetooth Headset

Plantronics Calisto Bluetooth Headset with USB charger and adapter.

Certified to use on Dragon NaturallySpeaking and MacSpeech Dictate

Noise-cancelling microphone with a 33-ft. range and up to 8 hours of talk time.

Reviewer's comments:

As far as the new Plantronics Calisto Bluetooth Headset Microphone is concerned, I give it excellent ratings. The noise-cancellation is great. I give it 5 out of 5 on my noise cancellation rating. Then I tested it with both Dragon NaturallySpeaking 9.5 Medical on a Motion Tablet PC with Bluetooth and then on my Desktop with Dragon NaturallySpeaking 10 Professional with the supplied USB Adapter (Dongle), which is used to pair with non Bluetooth compatible devices. For this recognition accuracy test I give it a 4 out of 5 rating. This headset is also very comfortable and lightweight, but the only way to wear it is by means of an ear hook, but as I stated it is very lightweight.

Plantronics BUA-100 Bluetooth USB Adapter

- Weight: .65 oz.
- Noise-canceling microphone

*Performance may vary by device.

** Headset can last up to four days without charging, based on an average talk time of 1.5 hours per day.

Before using the Plantronics Calisto headset, it must be charged first. To charge the headset, connect the USB headset charger to the charge connection found on the underside of the headset. The headset indicator light will glow solid red while the headset is charging, and will turn solid blue when the headset is fully charged. It is recommended to charge the headset for a minimum of two hours.

□ **Note:** Do not use the headset while it is charging and do not connect the USB charger while the headset is being used. Once the headset has been charged, it is ready for use. The Plantronics Calisto headset comes pre-paired with the USB Bluetooth adapter. If the headset is within range of the USB Bluetooth adapter, it will automatically connect to the adapter when the microphone is powered on. If a USB Bluetooth adapter has been purchased separately, the devices will need to be manually paired.
