

Nuance[®] Dragon[®] Home

Get more done on your PC by voice.

From students to parents to everyday multi-taskers, there's no better way to get more done on your PC simply by speaking than with Dragon[®] Home, version 15, the most intelligent speech recognition solution for home use.

Designed using Nuance[®] Deep Learning™ technology, Dragon Home intelligently takes your spoken words and transcribes them into text with up to 99% recognition accuracy, adapts to different accents, and even works in noisy environments.

Simply speak and watch your words appear on the screen 3x faster than typing. Dictate documents, send email, search the Web, and more. Work hands-free and speak commands to launch applications and control your computer – all by voice.

Dragon Home advantages

- Featuring Nuance Deep Learning technology means Dragon understands what you say as soon as you start dictating, without the need for training.
- With Dragon Home, you never have to be connected to the internet to dictate your documents and control your PC by voice.
- Use Dragon on major Windows[®] form factors, including today's

popular touchscreen PCs and tablets, and enjoy the versatility of interacting with your PC and favorite applications, whether at home or in school.

Exceptional capabilities

- Simply speak and watch your words appear on your computer screen. Create documents, get through your “to-do” list, send email or surf and search the Web – faster and more intelligently than ever before.
- Dragon Home is easy to install, simple to use, and makes even mundane PC tasks faster and more enjoyable.
- In addition to DragonPad, Dragon's built-in text editor, you can use Dragon Home with popular Windows applications. Dictate documents with Full Text Control in Microsoft Word[®], send email in Microsoft Outlook[®], search the Web using Internet Explorer[®], Mozilla Firefox[®] or Google Chrome™, post to Facebook or Twitter and more – all by voice. Dragon Home even enhances the experience of using your voice with the most popular web-based email application – Gmail™ – offering Full Text Control and commands for the most frequent actions in Internet Explorer 11, and the latest

Key features and benefits

- A next generation speech engine allows you to dictate 3x faster than typing with up to 99% accuracy
- Streamlined user interface allows you to quickly select the options you need and start turning your voice into text right away
- Easy proofreading with Playback feature that reads your dictation back in your own voice
- Dictate text within popular applications, including on the Web
- Create, format and edit by voice – think out loud and break creativity barriers
- Flexibility to select microphones, including those built into many laptops
- Intuitive design and helpful tutorials – easy to get started and easy to master

- versions of Mozilla Firefox and Google Chrome.
- Transform your ideas into text at the speed of thought: don't let typing, touch screen PCs, spelling, or fear of the blank page slow you down. Simply speak and let Dragon capture your thoughts quickly and accurately, so you'll never lose track of another great idea.
 - Create and edit documents, dictate homework assignments, send emails, update social posts and more. Dragon Home adapts to your voice and the words you use to deliver better recognition results over time. You can even have Dragon learn new words as you make document corrections.
 - Dragon also adapts its format rules by detecting your format corrections—abbreviations, numbers and more—so your dictated text looks the way you want it to every time.
 - Dragon Home makes reviewing and editing your content a breeze. A new Playback feature lets you select a block of text and “play that back” listening to your voice. As you listen, easily proofread your document and make edits and corrections faster as you become even better with your dictation.
 - Enjoy speed in dictation using Dragon Voice Shortcuts™ to collapse common multi-step tasks into direct voice commands, which can be used at any time, no matter which applications are

- currently active. For example, say “Search Google for 87 divided by 12” and Dragon makes it happen.
- Enjoy freedom and flexibility to choose your microphone option. Automatic microphone detection means Dragon will conveniently show you which microphones are available for you to use. You can also use multiple audio device types within the same profile so that you can easily switch to another microphone while keeping all your personalized preferences for accuracy and formatting.
 - Help prevent repetitive stress injuries by using your PC in a more comfortable, ergonomic way without being tied to your keyboard and mouse. Simply speak to launch applications, select menu items, and switch from one window to another using simple voice commands.

System requirements

- CPU: Intel® dual core or equivalent AMD® processor. Faster processors yield faster performance.
- RAM: Minimum 4 GB
- Free hard disk space: 4 GB (8 GB when installing from a digital download)
- Supported Operating Systems: Microsoft® Windows 7, 8.1, and 10 (32-bit and 64-bit)
- Internet Explorer 11 or higher, or current version of Chrome or Firefox
- Sound card supporting 16-bit recording
- A DVD-ROM drive for installation (not required for digital downloads)
- Built-in microphone or a Nuance-approved microphone. See support.nuance.com/compatibility/ for more information.
- An Internet connection is required for automatic product activation (a quick anonymous process) and to access online help.
