FACT SHEET

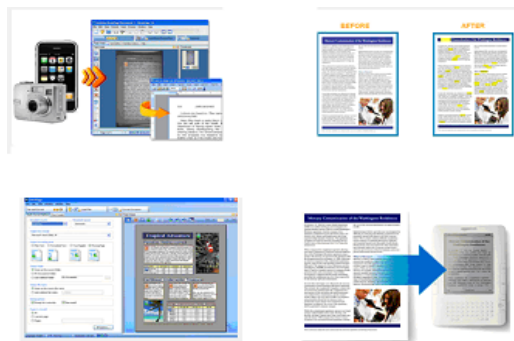

OmniPage Professional 18

Overview

OmniPage Professional 18 is the Nuance flagship document conversion and scanning application designed to handle high volumes of documents from multiple devices, document archiving to popular ECM systems, and document conversion in Cloud storage. OmniPage Professional allows you to turn paper, forms, digital camera images and PDF files into electronic files you can edit, search and share.

Customers use OmniPage for Four Basic Functions

- Repurpose documents automatically rather than retyping them
- Store paper documents as searchable electronic archives (also known as eDiscovery)

Share documents broadly and quickly via email, Cloud

services, Electronic Content Management, Microsoft SharePoint and more.

- Create and manage electronic forms processes

Common Problems

The continued use of paper slows organizations down and frequently leads to "knowledge recreation." This wasted time, where workers have to re-create information from existing paper documents or search for misplaced documents, is a drain on both productivity and profits:

- Editing or updating information requires the time consuming task of retyping the paper document
 - Filling out forms and then collecting the data can be the most time consuming component
- Filing information and retrieving it requires time spent searching through paper files, manila folders and file cabinets
- Sharing information is limited to inefficient and costly processes such as postal mail, courier or fax machines
 - Keeping information confidential is often a deterrent to sharing information digitally
- Critical documents are not backed up electronically for effective disaster recovery.
- Currently available OCR software included with a scanner, All-in-One or MFP device does not produce the quality required
- Re-formatting or re-editing of converted documents may be as time consuming as re-typing especially for documents with images, columns and tables

It all comes down to a single question for paper or electronic documents:

“How do I get the document into the format I want without having to do extensive re-typing or re-editing?”

OmniPage eliminates paper and digital inefficiency by improving productivity, enhancing responsiveness and reducing storage and material costs. Organizations save significant time and money by leveraging the superior OCR and document formatting accuracy of OmniPage to instantly convert documents into the format of their choice. Retyping is eliminated, tasks are automated, information is easily accessed and productivity soars.

What's New

- **Amazing 67% increase in layout accuracy**
- **34% increase in character accuracy on scanned halftone images**
- **20% increase in Japanese symbol accuracy**
- **27% average speed increase in processing multi-page documents**
- **62% improvement in compression on Searchable PDF-MRC files without losing character accuracy**

Additionally, if you are upgrading from version 17, you benefit from the following innovations.

- **Start Page provides guidance**
When OmniPage opens it presents clear options to open or scan documents, open OmniPage Project Documents and provides pre-programmed workflows to take your documents from one format to another in one easy step.
- **Most productive and accurate searchable PDF ever—eDiscovery Assistant for searchable PDF**
PDF files are everywhere and can come from a variety of sources. They can include scanned pages, embedded images, and other types of information. Many of these elements don't include searchable text. The new eDiscovery Assistant for searchable PDF is a revolution in safely converting a single PDF or batches of PDFs of all types into completely searchable documents. Now you don't have to open PDF .les one by one, or use an OCR process that might unintentionally wipe out valuable information.
- **Connect and convert in the Cloud**
Download input files from web storage sites and return recognition results there. OmniPage provides native integration with Evernote and Dropbox. In addition, the included Nuance Cloud Connector application provides access to a number of cloud services including Microsoft Live SkyDrive, GoogleDocs, Box.net and many more. The added benefit of the Nuance Cloud Connector is its ability to integrate directly with Microsoft Windows providing easy

OmniPage Professional 18

drag-and-drop access directly to cloud services. The Nuance Cloud Connector is also upgradeable to a more feature rich version of the product called Gladinet Cloud Desktop Pro. This enhanced version adds additional functionality for using cloud services for automatic backup and file synchronization.

- **Better scanned images produces better accuracy - Improved Pre-Processing**

The algorithms for removing speckles and dots from page images to help increase accuracy are improved, with a choice of despeckling methods (Normal, Halftone, Salt & Pepper).

- **Poorly scanned images need OmniPage with scanner enhancement tools (SET Tools)**

When whiteboard content is captured by digital camera, the text and diagrams can be enhanced for maximum readability. Auto-crop pages to have margins detected and reduced; the punch hole remover and border tools produce clean page borders without scanning shadows and marginal notes.

- **Automatic language detection**

Let the program assign a single language to each incoming page during unattended processing. It chooses from the languages with dictionary support that use a latin-based alphabet (so Russian and Greek are excluded) plus Japanese, Korean and Chinese (Traditional and Simplified). When this feature is enabled, no manual language selection is necessary.

- **Better control over determining blank pages**

A new sensitivity setting increases the accuracy of recognizing blank pages that may scan as light gray or colored pages by allowing the threshold for blankness to be adjusted. This improves the use of two controls: the new pre-processing option 'Drop blank pages' and the existing saving option 'Create a new file at each blank page'.

- **ISIS scanners:**

Scanners that support ISIS drivers can be used to scan directly into OmniPage.

System Requirements:

- Windows 7 32-bit or 64-bit Editions, Windows Vista 32-bit or 64-bit Editions with Service Pack 2, Windows XP 32-bit Edition with Service Pack 3
- A computer with a 1 GHz Intel® Pentium®, or higher, or equivalent processor. Multi-Core processor recommended for advanced performance
- 512 MB of memory, 1GB recommended for advanced performance.
- 250 MB of free hard disk space for the application files and sample images, plus 100 MB working space during installation. An additional 230 MB for RealSpeak(tm) Solo speech modules. 150 MB for PDF Create! 500 MB for PaperPort. 30 MB for Nuance Cloud Connector
- 1024x768 pixel color monitor with 16-bit color or greater video card
- CD-ROM drive for installation
- WIA, TWAIN or ISIS scanner driver
- 2-megapixel digital camera with auto-focus or higher for digital camera text capture
- Web access needed for online Activation, Registration, Live Update and Nuance Cloud Connectors

Note: Performance and speed will be enhanced if your computer's processor, memory, and available disk space exceed minimum requirements. This is especially true when converting very large color PDF files.
