### Nuance & MacSpeech Certified Revolabs USB Wireless Microphone

(Nuance certifies Revolabs with 🏆🏆🏆🏆 Dragon out of Five)

The Revolabs xTag wireless microphone system brings unmatched audio performance to the individual workspace. The desktop system connects to any computer (PC including Vista or Mac OS) via a USB without the need for software install. The xTag is an ideal solution for demanding personal audio applications such as MacSpeech Dictate, Webconferencing, Podcasting, Voicelift, Skype and Google Talk, Speech Dictation, among many others.

This is an amazing little device. It is about the size of a lipstick and actually is a noise-canceling microphone. The base station plugs directly into a USB port and does not require special drivers. The base station is about the size of two iPods stacked on top of one another, so it is actually pretty easy to carry around. While a bit more bulky, its footprint is actually less than that of a conventional headset. The microphone itself clips to your collar or lapel.

## Key Features

### Ease of Use

The xTag USB Desktop is a plug-and-play personal microphone that is instantly recognized by all operating systems and immediately usable out of its box.

### High Comfort

The small form factor and wireless capability combined with the lack of a headset, makes the xTag USB Desktop an attractive and comfortable alternative.

### Rechargeable Battery

The xTag USB Desktop has a rechargeable battery that provide eight hours of talk time after each charge. The unit will be charged any time the USB cable is connected.

### High Quality

Recording/Voice Lift Capability: The xTag USB Desktop provides extremely high quality input for VOIP, Internet Telephony, Webconferencing and Recording via its state-of-the-art noise-canceling technology.

## Benefits

- Nothing beats the look, comfort of an xTag because it's a lapel microphone.
- No headset means you look more professional when dictating, especially in front of clients / customers / patients.
- Excellent accuracy.
- 8 hour talk time.
- Charges from any USB port.
- Great noise cancellation for a lapel microphone. This microphone will not pick up keyboard clicks, chair squeaks, laser printer from 3 feet away or someone talking on a telephone from 8 feet away.
- 128 bit encryption
- Includes remote dual function Mute and On/Off switch.

## Base Station / Charging Tray

The base station/ charging tray is the communications hub of the xTag Desktop. This remarkably compact unit controls all communication flow of the xTag Desktop system. Use the USB connector to connect directly to your Mac or PC and get all the mobility you want.
